Create Portal User Using Zoho Creator

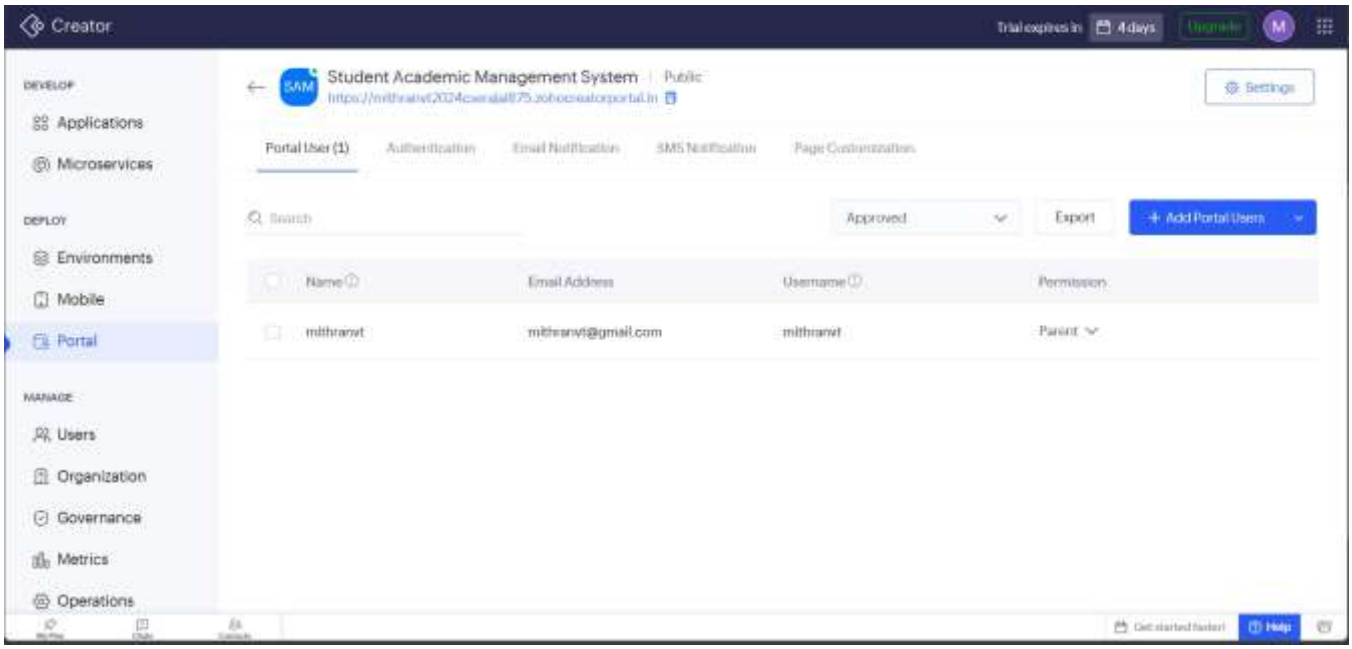

Aim

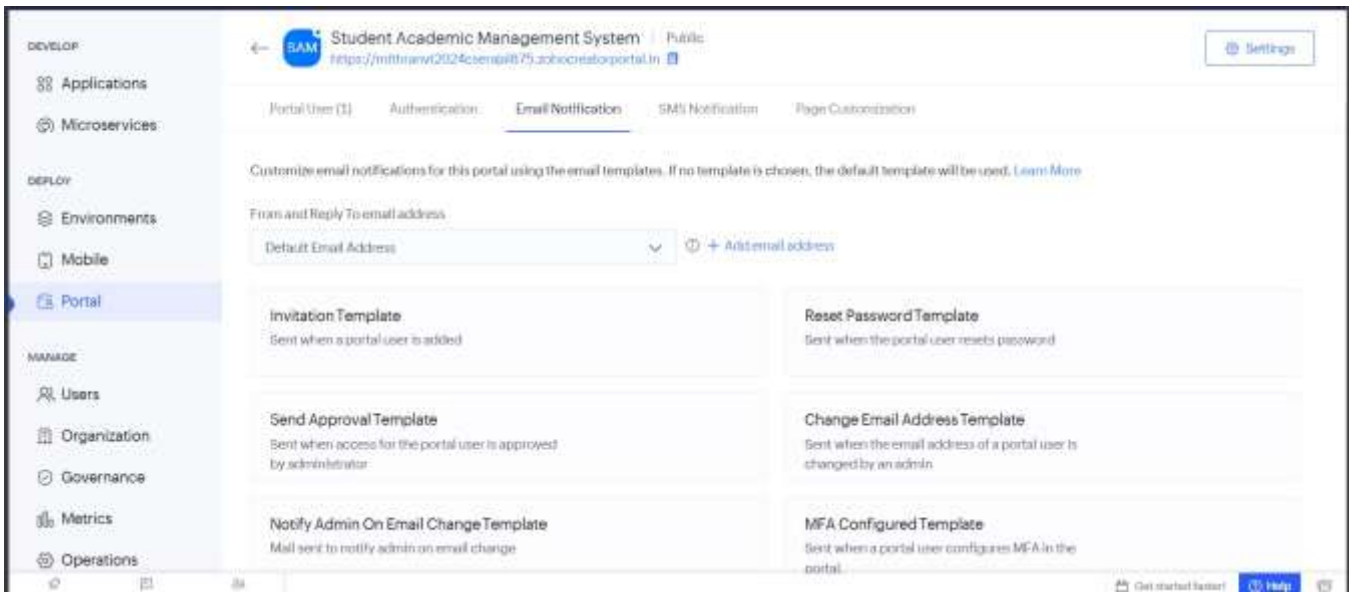

To create and configure a portal in Zoho Creator to provide external users with controlled access to the EviTrace application.

Procedure

1. Log in to Zoho Creator and open the Student Academic Management System application.
2. Navigate to the Users and Permissions section.
3. Select Portals and create a portal if one has not already been created.
4. Configure the portal name, URL, and required access settings.
5. Create a suitable portal permission set for students, allowing access only to the necessary forms, reports, and pages.
6. Open the portal's Users section and select the option to add a new user.
7. Enter the student's email address and other required details.
8. Assign the appropriate student permission set or portal role.
9. Send the portal invitation to the student.
10. Ask the student to accept the invitation, sign in, and verify access to the permitted academic records.

Invitation Template
Sent when a portal user is added
Reset Password Template
Sent when the portal user resets password
Send Approval Template
Sent when access for the portal user is approved by administrator
Change Email Address Template
Sent when the email address of a portal user is changed by an admin
Notify Admin On Email Change Template
Mail sent to notify admin on email change
MFA Configured Template
Sent when a portal user configures MFA in the portal
Help

Result

The portal user was created successfully in Zoho Creator. The student can access the Student Academic Management System through the portal and view the academic information permitted by the assigned access settings.
